### Professional Experience

---

#### Data Analytics Consultant – Sunwest Dry Cleaning (Sole Contractor)

Remote | July 2025 – August 2025

- Designed and implemented an automated workflow to extract structured data from multi-format PDFs (bank statements, POS system reports, service logs) using Python, achieving 95%+ extraction accuracy
- Developed transformation logic to clean and standardize data, enabling seamless loading into Excel and integration with interactive dashboards for operational insights

- Created a user-friendly application with exception handling and error logging, reducing manual data entry time and improving reporting turnaround from days to minutes

### Associate Consultant – MIP Australia Pty Ltd

Sydney, NSW | April 2024 – Present

- Completed 4-month intensive training on data analytics tools and methodologies including SQL, Alteryx, Power BI, and Tableau
- Contractor work delivering data consulting services to clients across a number of industries

### Data Analytics Consultant – Pacific National (Contract)

Remote | May 2025 – June 2025

- Development and Production Tableau Server environment upgrade from their current version to the specified version agreed upon
- Collaborated in defining project objectives, identifying required features, and capturing key considerations for the testing strategy
- Designed and documented a comprehensive upgrade testing scope, including step-by-step validation checklists
- Conducted end-to-end testing across development and production environments, verifying the integrity of Tableau dashboards, databases, data sources, schedules, jobs, tasks, and user permissions post-upgrade

### Data Analytics Consultant – VetPartners (Contract)

Remote | October 2024 – April 2025

- Multi-system data migration project from legacy PMS systems to Salesforce CRM via ETL processes, Alteryx workflows and custom migration logic
- Conducted data exploration, cleansing, and validation using MySQL (Amazon RDS) and Microsoft SQL Server on AWS EC2, contributing to an optimized data pipeline
- Automated transformation layers to ensure consistent formatting and granularity across data sources through Alteryx workflows
- Resolved data anomalies via exception reports and stakeholder collaboration, enabling successful ETL cutovers

### Data Analytics Consultant – RMIT (Contract)

Remote | July 2024 – October 2024

- Supported data transformation and validation in the migration of historical datasets into Oracle Database, contributing to foundational data architecture redesign
- Created and executed SQL schema creation scripts to structure tables for downstream loading
- Used Python libraries such as FuzzyWuzzy and RecordLinkage to perform text matching and deduplication across datasets, improving merge accuracy between old and new CRM records
- Collaborated with stakeholders to ensure business continuity and accuracy throughout migration

### Operations Coordinator/Sales Graduate – The Val Morgan Group

Sydney, NSW | April 2022 – June 2023

- Operations Coordinator – Val Morgan Cinema Sydney Operations Department
- Graduate Program – Sales Graduate Position, rotation through 4 departments

### UNSW Media Internship – Amber Renae Coaching Calls

Remote Work | June 2020 – July 2020

### Market Research Fieldworker HTS Project – Ernst and Young Services Pty Ltd

Remote Work | September 2019 – March 2020
